RISK FACTORS

The Issuer and the Guarantor believe that the following factors may affect their ability to fulfil their obligations under the Bonds and the Guarantee, respectively. Factors which the Issuer and the Guarantor believe may be material for the purpose of assessing the market risks associated with the Bonds are also described below.

The Issuer and the Guarantor believe that the factors described below represent the principal risks inherent in investing in the Bonds, but the Issuer or the Guarantor may be unable to pay interest, principal or other amounts on or in connection with the Bonds or the Guarantee, respectively, for other reasons than those described below, and the Issuer and the Guarantor do not represent that the statements below are exhaustive. Prospective investors should also read the detailed information set out elsewhere in this Prospectus (including any documents incorporated by reference herein) and reach their own views prior to making any investment decision.

Words and expressions defined in "Terms and Conditions of the Bonds" below shall have the same meanings in this section.

Risks relating to the Guarantor and the Hannover Re Group

Set out below are risks associated with the Guarantor and the Hannover Re Group which may have a material impact on its business operations and/or the level and volatility of its profitability, and therefore its ability to perform its obligations under the Bonds, including:

Business and company-related risks

Business relations with primary insurers

Within the scope of its reinsurance business, the Hannover Re Group underwrites the business of primary insurers, which means that facts and circumstances in the insurers' environment may also indirectly influence the Hannover Re Group. These circumstances include, in particular, the risk that insurers may write less business – as a result of which a smaller volume is also reinsured –, the risk that insurers may write business, the quality of which is incorrectly assessed by the Hannover Re Group as more favourable than it actually is, and the risk that the credit status of insurers may develop worse than the Hannover Re Group had anticipated at the time when the reinsurance treaties in question were written. The materialisation of each of these individual circumstances could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Business relations with retrocessionaires

The Hannover Re Group systematically uses retrocessions and protection covers to smooth results and optimise its net income; in this context it attaches considerable importance to the quality and credit status of its retrocessionaires. The assets, financial position and net income of the Hannover Re Group could therefore be adversely affected if the market conditions for retrocession deteriorate to the detriment of reinsurers in the future, if certain protection covers – especially catastrophe excess of loss covers – are no longer available or if individual retrocessionaires should become unable or unwilling to pay.

Rating of the Hannover Re Group

The business result of the Hannover Re Group is influenced by its ability to acquire new insurance business at advantageous conditions, to expand existing profitable business relationships and to raise capital on the financial markets. Of particular significance to this ability is the evaluation of the financial strength and creditworthiness and hence also indirectly of the competitiveness of the Hannover Re Group and its individual companies by specialised agencies (hereinafter referred to as

its "rating"). The most important rating for the Hannover Re Group is the Insurer Financial Strength Rating, which evaluates the financial strength of the Hannover Re Group on the basis of the factors that are relevant to policyholders and ceding companies. These factors include, most notably, the capital adequacy, market positioning, risk management and earnings outlook.

The current (Q1/2010) financial strength rating for the Guarantor from Standard & Poor's Rating Services, a division of The McGraw-Hill Companies, Inc. ("**Standard & Poor's**") is "AA-" ("Very strong", stable outlook), while that of A.M. Best Company ("**A.M. Best**") is "A" ("Excellent", stable outlook). A downgrade in the rating can have significant adverse implications for the conditions of new and existing business, impair competitiveness and increase the costs of financing for the Hannover Re Group. In addition, a downgrade can result in the materialisation of new or accelerated maturity of existing liabilities that are contingent upon maintenance of a particular rating. Each downgrade of the rating could therefore detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Risks from insurance contracts

The business conducted by the Hannover Re Group is founded on the deliberate assumption of risks through the conclusion of insurance and reinsurance contracts. The Hannover Re Group constantly assesses and monitors these risks and reviews their probability of occurrence. This also includes ongoing monitoring of legal, demographic, macroeconomic and environmental developments being outside the influence of the Hannover Re Group. As a general principle, the Hannover Re Group concludes insurance contracts only if the premiums (including the investment income generated from these premiums) are expected to exceed the calculated risk and it establishes actuarially determined provisions for the occurrence of claims. If the premiums calculated upon contract closing do not suffice to fund the resulting losses, if the premium calculations are based on inaccurate assumptions, if the companies belonging to the Hannover Re Group fail to (fully) identify or correctly evaluate developments, if unexpected developments occur on the claims side or if retrocessionaires with which the Hannover Re Group has, for its part, reinsured risks default on payment, this could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Provisions

The Hannover Re Group calculates the amount of the provisions that are to be established for insured events in accordance with relevant actuarial methods that reflect assumptions and empirical values. The level of provisions constituted is regularly adjusted in the context of normal run-off with the aid of the latest information available to management. The adequacy of the provisions initially constituted and subsequently adjusted as necessary cannot be assured. In the insurance and reinsurance market this was demonstrated in the past, for example, by claims connected with asbestos. If, on the basis of the actual future development – especially with respect to risks that have currently not even been recognised as such – or as a consequence of the inaccurate selection or application of methods to calculate the constituted provisions, the Hannover Re Group were to be compelled to increase the provisions or if the liabilities of the Hannover Re Group in connection with the events that it has insured were to be higher than the constituted provisions, this could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Market- and competition-related risks

Competition

The competitiveness of the Hannover Re Group is influenced by numerous factors. They include, inter alia, the Hannover Re Group's financial strength, rating, experience, local presence and reputation, the quality of its client relationships, the type, scope and conditions of its offered products and services, the efficiency of its receivables management as well as its ability to respond

appropriately to changing customer requirements and the behaviour of its competitors. The Hannover Re Group constantly monitors changing customer requirements and the behaviour of its competitors, and it adjusts its range of products and services accordingly. Should, however, the Hannover Re Group be unable to respond appropriately to new developments, this could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Cyclical business

Non-life reinsurance is essentially a cyclical business. The same is true to a lesser extent of life reinsurance. This means that the business volume of the Hannover Re Group does not develop in a linear manner. In past years the volume of reinsurance business has therefore been subject to considerable fluctuations, which can be attributed to a broad range of factors. These factors, which cannot always be foreseen and/or influenced, include inter alia competition among reinsurers, the frequency and scale of catastrophic events, the availability of reinsurance capacities, the volatility of capital markets and the general economic conditions. Furthermore, these factors have also brought about changes in treaty conditions and hence profit margins in the past. A slowdown or decline in the business development could detrimentally affect the assets, financial position or net income of the Hannover Re Group.

Catastrophic events

Both natural catastrophes and man-made disasters are partially covered by insurance policies in the non-life and life/health (re)insurance written by the Hannover Re Group. Such catastrophic events include, among other things, windstorms and hailstorms, floods, earthquakes, major fires, cold spells, factory explosions, and insurrections. Neither catastrophes as such nor the scale of loss and damage caused by such events can be foreseen. Even though the Hannover Re Group monitors the aggregate risk with respect to catastrophic events in each geographical region, catastrophe-related damage and claims can lead to extraordinarily high losses. Should the scale of catastrophe losses increase in the coming years relative to the multi-year average, this could have a corresponding detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Interest rate fluctuations

In past years fluctuations in the level of both short- and long-term interest rates have influenced the amount of gains and losses on securities held among the Hannover Re Group's financial assets as well as the point in time when such gains or losses were realised. The Hannover Re Group increased its holdings of fixed-income securities from € 17.9 billion at the end of 2008 to € 19.7 billion at the end of 2009, the bulk of which are denominated in euros and US dollars. This is equivalent to around 87.5 % of total financial assets as at 31 December 2009. An increase in the interest rate level could therefore reduce the market price of the financial assets. If the market price were to fall below amortised cost for a sustained period, this would have to be written down to fair value with a charge recognised in income – which could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Falling prices on stock markets

In the aftermath of the historic price falls on international stock markets in 2008, many investors became more risk-averse – secure government bonds and gold were preferred investment vehicles.

As a consequence, the Hannover Re Group has scaled back its exposure to a marginal holding (<1 %) of equity securities in 2008. However, holding may be increased in the future. Therefore, stock market volatility could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Exchange rate fluctuations

The Hannover Re Group writes (re)insurance business worldwide in numerous international currencies and prepares annual and interim financial statements in euros, as a consequence of which the Group is exposed to exchange rate fluctuations. The Hannover Re Group reduces the resulting currency risks through the use of matching currency coverage as well as derivative financial instruments. This does not, however, make definitive hedging possible, and an exchange rate risk, especially with respect to the euro/US dollar exchange rate, consequently remains. Changes in the exchange rates used to convert a foreign currency into euro can therefore have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Operational Risks

Operational risks encompass the risk of losses occurring because of the inadequacy or failure of internal processes or as a result of events triggered by employee-related, system-induced or external factors. Operational risks exist, inter alia, in relation to the risk of business interruptions or system failures or may derive from unlawful or unauthorised acts. Because of the broad spectrum of operational risks, the realisation of one of these risks could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Emerging Risks

The hallmark of emerging risks (such as nanotechnology or climate change) is that the content of such risks cannot as yet be reliably assessed – especially with respect to our treaty portfolio. Such risks evolve gradually from barely perceptible signals to unmistakable tendencies. The realisation of one of these risks could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Counterparty risks

Hannover Re Group has monetary and securities claims under numerous transactions against retrocessionaires, ceding companies, brokers and other debtors. In view of the general economic downturn, the uncertain development of capital markets, the decline in real estate values and comparable influencing factors, increased default by debtors may occur (counterparty risk). This increased default would mean that value adjustments above and beyond the extent already covered by provisions would have to be made on assets of the Hannover Re Group; this could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Loss of a number of key clients

At the moment Hannover Re Group is not materially dependent on one single client. If however Hannover Re Group would lose a number of its key clients, it could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Proposals for the future accounting of insurance contracts under IFRS

Currently, the Hannover Re Group accounts for insurance contracts in its consolidated financial statements in accordance with US GAAP because the IFRS governing the accounting of insurance contracts (IFRS 4) does not provide any measurement guidance for these contracts. In consequence, IFRS 4 allows maintaining previously applied accounting principles until a comprehensive IFRS on insurance accounting will be in place. The IASB has announced to issue a final IFRS for insurance contracts in 2011. It is expected that this new standard will have to be first-time adopted by 2013 at the earliest. Based on present information, the introduction of the new standard may lead to substantial changes in the existing recognition and measurement methods for insurance contracts as well as in the current IT environments and work processes. Moreover, the envisaged changes in accounting may affect products and prices in direct insurance and

reinsurance. Furthermore, the proposals may lead to a substantially higher volatility of the consolidated results, which may cause higher capital costs and pressure on share prices.

Risks due to regulatory changes

As an internationally operating reinsurer Hannover Re Group is confronted with a broad diversity of risks that are indivisibly connected with entrepreneurial activities and which manifest themselves differently in the individual business groups and geographical regions.

In this sense, Hannover Re Group is subject to local legal requirements. Restructuring and additional expenses can result from changes in the local laws and regulations governing labour law, the social security and pension systems, financial services, taxation or securities products and transactions. In some countries, changes may also be introduced with retroactive effect. These changes could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Terrorist attacks and other geopolitical risks

Following the attack on the World Trade Center on 11 September 2001, reinsurance companies have generally either excluded terrorism risks in their insurance terms and conditions or substantially increased the premiums for their covers. The Hannover Re Group, too, followed this trend. However, it has not been possible to exclude liability under all contracts, as a consequence of which the Hannover Re Group continues to cover terrorism risks in certain cases. In addition, the Hannover Re Group may incur an exposure if a terrorist attack is followed by insured consequential losses such as fires. It is therefore not possible to arrive at a definitive assessment as to whether – and if so to what extent – the Hannover Re Group will be impacted by further terrorist attacks or by military responses to such attacks in the course of its business. The occurrence of these risks could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Risks due to development of the global economy

Hannover Re Group has been and may continue to be affected by the development of the global economy in general and global capital markets in particular. The global economy has recently experienced a significant downturn reflecting the effects of the credit market crisis, slower economic activity, a generally negative economic outlook and a decrease in consumer and business confidence. The recent worldwide economy crisis has expanded to essentially all regions and all business sectors and could continue to deteriorate. Hannover Re Group's management cannot assess how the global economy and the global capital markets will develop in the near future. A significant further deterioration of the global economy or a significant prolongation of the economic crisis could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Legal risks

Legal disputes

On the basis of their activities as reinsurers and primary insurers, the companies belonging to the Hannover Re Group are involved in legal and arbitration proceedings both as complainant and respondent. Legal disputes also exist on account of differences of opinion with public authorities, especially tax authorities, and with employees. The outcome of such proceedings cannot be determined in advance. It is the assumption of the Hannover Re Group that the currently pending proceedings will not have any significant detrimental effect on the assets and net income of the Hannover Re Group. Should this assessment prove inaccurate, these proceedings could detrimentally affect the assets and net income of the Hannover Re Group.

Amendments to existing and adoption of new legal provisions

The business of the Hannover Re Group is governed by detailed regulatory provisions. In light of the own funds requirements arising out of the Solvency II Directive, reinsurance is in Hannover Re Group's view taking on even greater significance as a tool for insurers. Nevertheless, amendments to existing provisions and the adoption of new provisions could necessitate restructuring activities and increase capital requirements resulting in increased costs for the Hannover Re Group. In addition, changes in the existing legal situation can adversely affect the economic position of primary insurers. These changes – which may impact the Hannover Re Group directly or merely indirectly – could detrimentally affect the assets, financial position and net income of the Hannover Re Group.

Changes in certain tax laws

At various locations the Hannover Re Group profits generally or in relation to certain products from favourable tax provisions; this applies, for example, to Ireland and Bermuda. Should these advantageous tax provisions cease to apply, this could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Risks relating to the Issuer

Set out below are risks associated with the Issuer which may affect its ability to perform its obligations under the Bonds.

Risks relating to Issuer's dependency on the Guarantor and the Hannover Re Group

The Issuer is a funding vehicle for the Hannover Re Group. As such, it raises funds through the issuance of bonds, notes and private placements or by the acceptance of loans from credit institutions and deposits of Group members. The Issuer may on-lend these funds to some extent to the Guarantor and other companies of the Hannover Re Group. In the future the Issuer may raise further funds to on-lend these. Thus, the Issuer is dependent on the Guarantor (e.g. as counterparty of such internal agreement, the issuer of the guarantee and as potential borrower) and a material adverse change in the financial position of the Guarantor or another member of the Hannover Re Group could affect the Issuer's financial performance. In the event that the Guarantor fails to make a payment under such internal agreement the Issuer may not be able to meet its payment obligations under the Bonds issued by it.

Financial Risks

Currency risks

Hannover Finance (Luxembourg) S.A. is exposed to currency risks deriving from positions and future transactions in currencies other than in euros. The Issuer hedges this risk exposure by entering into currency forward transactions, currency swap transactions and by funding the intercompany loans in the required original currencies. Unfavourable exchange rates may negatively impact the Issuer's reported financial performance.

Interest rate risks

In past years fluctuations in the level of both short- and long-term interest rates have influenced the amount of gains and losses on securities held at Hannover Finance (Luxembourg) S.A. as well as the point in time when such gains or losses were realised. If the market price were to fall below amortised cost for a sustained period, this would have to be written down to fair value with a charge recognised in income. In addition, Hannover Finance (Luxembourg) S.A. is exposed to interest rate risk on the interest-bearing receivables deriving from the provision of intercompany loans granted to other members of the Hannover Re Group and interest-bearing current and long-term liabilities arising from the financing situation of Hannover Finance (Luxembourg) S.A. In relation to fixed

interest receivables and liabilities, it is exposed to fluctuations in market values. Each of these risks could adversely affect the Issuer's reported financial performance.

Credit risks

Third-parties that owe Hannover Finance (Luxembourg) S.A. money, securities or other assets may not pay or perform under their obligations. These parties include the issuers whose securities Hannover Finance (Luxembourg) S.A. holds, borrowers under loans made, trading counterparties, clearing agents, exchanges, clearing houses and other financial intermediaries. These parties may default on their obligations to Hannover Finance (Luxembourg) S.A. due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons.

Liquidity risks

Hannover Finance (Luxembourg) S.A. is exposed to liquidity risks. Fluctuations in capital markets and global economic downturns may adversely affect the liquidity of security holdings.

Risks relating to the Bonds

An investment in the Bonds involves certain risks associated with the characteristics of the Bonds. Such risks could result in principal or interest not being paid on time or at all by the Issuer or the Guarantor and/or a material impairment of the market price of the Bonds. The following is a description of risk factors in relation to the Bonds.

Bonds may not be a suitable investment for all investors

Each potential investor in the Bonds must determine the suitability of such investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained or incorporated by reference in this Prospectus;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds, including where principal or interest is payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Long-term securities

The Bonds will be redeemed at par on the Floating Interest Rate Payment Date falling on or nearest to 14 September 2040 (the "**Scheduled Maturity Date**"), provided that on or prior to such date no Solvency Capital Event (subject to limited exceptions) and no Potential Insolvency Event has occurred and is continuing, and no Solvency Capital Event (subject to limited exceptions) or Potential Insolvency would occur as a result of such redemption of the Bonds, in which case the redemption of the Bonds will be postponed (see "Potential postponement of the maturity date of the Bonds" below).

The Issuer is under no obligation to redeem the Bonds at any time before this date, and the holders of the Bonds (each a "**Bondholder**") have no right to call for their redemption.

Potential postponement of the maturity date of the Bonds

If on or prior to the Scheduled Maturity Date a Solvency Capital Event (subject to limited exceptions) or a Potential Insolvency Event has occurred and is continuing, or if a Solvency Capital Event (subject to limited exceptions) or a Potential Insolvency Event would occur as a result of the redemption of the Bonds on such date, the Bonds will only be redeemed on the next Floating Interest Payment Date on which neither a Solvency Capital Event (or one of the limited exceptions therefrom; e.g. prior consent of the Competent Supervisory Authority to the redemption) nor a Potential Insolvency Event is continuing, all as further described in the definition of the term Final Maturity Date.

Therefore, Bondholders may receive their investment back at a later point in time than initially expected.

If the Bonds are not redeemed on the Scheduled Maturity Date due to the reasons set out above, Bondholders will – subject to any mandatory or optional suspension – continue to receive interest but will not receive any additional compensation for the postponement of the redemption.

Risks in case of an early redemption of the Bonds

At the Issuer's option, the Bonds may be redeemed prior to the Scheduled Maturity Date at their principal amount, if, as a result of a future change of the laws applicable in Luxembourg or in Germany, (i) the Issuer will be obligated to pay Additional Amounts or (ii) interest payable by the Issuer in respect of the Bonds or any amount payable by the Guarantor under the Guarantee is no longer fully deductible by the issuer and/or the Guarantor for Luxembourg and German income tax purposes. The Bonds may also be redeemed at the principal amount if the Bonds do no longer qualify as regulatory capital as intended upon issuance of the Bonds or if the capital treatment of the Bonds becomes materially unfavourable, in the reasonable opinion of the Guarantor, after a change in the rating methodology of at least one agency among Standard & Poor's and A.M. Best, or any respective successor.

The Bonds may also be redeemed at the option of the Issuer at their principal amount on the First Call Date or on any Floating Interest Payment Date thereafter.

If Bonds are redeemed prior to maturity, a Bondholder is exposed to the risk that due to the early redemption his investment will have a lower than expected yield and to the risks connected with any reinvestment of the cash proceeds received as a result of the early redemption.

Subordination

The Bonds and the Guarantor's obligations under the Guarantee will be unsecured subordinated obligations of the Issuer and the Guarantor, respectively. In the event of any dissolution, liquidation, insolvency or any proceeding for the avoidance of an insolvency of the Issuer or the Guarantor, payments on the Bonds will be subordinated in right of payment to the prior payment in full of all other unsubordinated liabilities of the Issuer and the Guarantor and to all subordinated obligations of the Guarantor pursuant to § 39(1) of the German Insolvency Code (*Insolvenzordnung*), except for any subordinated obligations which are required to be preferred by law and for those liabilities which rank *pari passu* with, or junior to, the Bonds or the Guarantor's obligations under the Guarantee. In a liquidation, dissolution, insolvency, composition or other proceeding for the avoidance of insolvency of, or against, the Issuer or the Guarantor, the Bondholders may recover proportionately less than the holders of unsubordinated obligations of the Issuer or the Guarantor, as the case may be.

The Bondholders must accept that, in the circumstances described above, payments in respect of the Bonds will be made by the Guarantor pursuant to the Guarantee only in accordance with the subordination described above.

Interest suspension

Bondholders should be aware that, in certain cases, interest will not be due and payable (*fällig*) on the scheduled Interest Payment Date, and that the payment of the resulting Arrears of Interest is subject to certain further conditions.

Mandatory suspension of interest payments

In case a Mandatory Suspension Event has occurred and is continuing on the relevant Interest Payment Date, interest which accrues during the period ending on but excluding such Interest Payment Date will not be due and payable (*fällig*) on that Interest Payment Date.

A Mandatory Suspension Event will occur on an Interest Payment Date if on or prior thereto (i) a Potential Insolvency Event has occurred and is continuing, or (ii) the Competent Supervisory Authority has notified the Issuer or the Guarantor in writing that the Issuer or the Guarantor must suspend payments under the Bonds, or (iii) a Solvency Capital Event has occurred or is continuing. Any failure to pay interest as a result of such mandatory suspension will not constitute a default of the Issuer or any other breach of obligations under the Bonds or for any other purpose. Interest suspended will constitute Arrears of Interest.

Bondholders will not receive any additional interest or compensation for the mandatory suspension of payment. In particular, the resulting Arrears of Interest will not bear interest.

Optional suspension of interest payments

Even if no Mandatory Suspension Event has occurred, the Issuer may, with respect to each Optional Interest Payment Date, elect in its discretion to suspend the payment of interest by giving not less than 10 and not more than 15 Business Days' prior notice to the Bondholders. Such interest will not be due and payable (*fällig*) on that Interest Payment Date.

Bondholders will not receive any additional interest or compensation for the optional suspension of payment. In particular, the resulting Arrears of Interest will not bear interest.

Restrictions on payment of Arrears of Interest

The Issuer will only be entitled to pay Arrears of Interest at any time (i) if no Potential Insolvency Event has previously occurred and is continuing, and (ii) if, where the relevant suspension was due to the occurrence of a Mandatory Suspension Event other than a Potential Insolvency Event, the Competent Supervisory Authority has given its prior approval to the payment of the Arrears of Interest (if required at the time). These restrictions also apply in the case of a mandatory settlement of Arrears of Interest, as further described in the Terms and Conditions.

No express Events of Default

The Bondholders should be aware that the Terms and Conditions of the Bonds do not contain any express events of default provision.

Changes in Applicable Supervisory Regulations upon implementation of the Solvency II Directive

The Terms and Conditions of the Bonds provide that interest payments must be suspended and the scheduled maturity date must be postponed (in each case subject to limited exceptions further described in the Terms and Conditions), inter alia, if under the Applicable Supervisory Regulations a Solvency Capital Event has occurred and is continuing.

In addition, the Issuer may call the Bonds for redemption prior to the Final Maturity Date, inter alia, if, upon the implementation of the Solvency II Directive into the Applicable Supervisory Regulations

the Bonds would not be eligible to qualify for the inclusion in the determination of the tier 2 regulatory capital for single solvency purposes of the Guarantor or for group solvency purposes of the Guarantor's group (if and to the extent it is subject to supervision for group solvency purposes).

Although the Solvency II Directive has been adopted by the European Parliament and the Council of the European Union and published in the Official Journal of the European Union on 17 December 2009, the implementation guidelines in general and the exact requirements for instruments eligible as tier 2 regulatory capital in particular have not been finalised yet.

Therefore, it is currently difficult to predict the exact effect the implementation of the Solvency II Directive will have on the Guarantor and the Hannover Re Group as well as on the eligibility of the Bonds as tier 2 regulatory capital.

Accordingly, Bondholders should be aware that the final implementation guidelines for the Solvency II Directive may lead to, or increase the likelihood of, a suspension of interest payments under the Bonds and/or a postponement of the scheduled maturity date of the Bonds and/or an early redemption of the Bonds.

No limitation on issuing further debt and guarantees

There is no restriction on the amount of debt which the Issuer may issue ranking equal or senior to the obligations under or in connection with the Bonds and there is no restriction on the amount of debt or guarantees which the Guarantor may issue ranking equal or senior to the obligations under or in connection with the Bonds. Such issuance of further debt may reduce the amount recoverable by the Bondholders upon insolvency or winding-up of the Issuer or the Guarantor or may increase the likelihood that payments of the principal amount or interest under the Bonds will be mandatorily suspended or may, in the case of interest payments, be suspended at the option of the Issuer.

Liquidity risk

There is currently no secondary market for the Bonds. Application has been made for the Bonds to be admitted to trading on the EU-regulated market segment of the Luxembourg Stock Exchange and to be listed on the official list of the Luxembourg Stock Exchange. There can, however, be no assurance that a liquid secondary market for the Bonds will develop or, if it does develop, that it will continue. In an illiquid market, an investor may not be able to sell his Bonds at any time at fair market prices. The possibility to sell the Bonds might additionally be restricted by country specific reasons.

Fixed to Floating Rate Bonds

The Bonds bear interest at a fixed rate to but excluding the First Call Date.

A holder of a fixed interest rate bond is exposed to the risk that the price of such bond may fall because of changes in the market interest rate. While the nominal interest rate of a fixed interest rate bond is fixed during the life of such bond or during a certain period of time, the current interest rate on the capital market (market interest rate) typically changes on a daily basis. As the market interest rate changes, the price of such bond changes in the opposite direction. If the market interest rate increases, the price of such bond typically falls, until the yield of such bond is approximately equal to the market interest rate. If the market interest rate falls, the price of a fixed interest rate bond typically increases, until the yield of such bond is approximately equal to the market interest rate. Bondholders should be aware that movements of the market interest rate can adversely affect the price of the Bonds and can lead to losses for the Bondholders if they sell Bonds during the period in which the market interest rate exceeds the fixed interest rate of the Bonds.

From and including the First Call Date to but excluding the Final Maturity Date, the Bonds bear interest at a floating rate.

Investors should be aware that the floating rate interest income on the Bonds cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of the Bonds at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods. In addition, after interest payment dates, investors are exposed to the reinvestment risk if market interest rates decline. That is, investors may reinvest the interest income paid to them only at the relevant lower interest rates then prevailing.

Ratings of the Bonds, if any, may be subject to change at all times

One or more independent credit rating agencies may assign credit ratings to the Bonds. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Bonds. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Rating agencies may also change their methodologies for rating securities with features similar to the Bonds in the future. If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Bonds were to be subsequently lowered, this may have a negative impact on the trading price of the Bonds.

Currency Risk in relation to Bonds

The Bonds are denominated in euro. If such currency represents a foreign currency to a Bondholder, such Bondholder is particularly exposed to the risk of changes in currency exchange rates which may affect the yield of such Bonds measured in the Bondholder's currency. Changes in currency exchange rates result from various factors such as macroeconomic factors, speculative transactions and interventions by central banks and governments.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

Because the Global Bonds are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer.

The Bonds will be represented by one or more Global Bonds. Such Global Bonds will be deposited with a common depositary for Euroclear and Clearstream, Luxembourg. Investors will not be entitled to receive definitive Bonds. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the Global Bonds. While the Bonds are represented by one or more Global Bonds, investors will be able to trade their beneficial interests only through Euroclear and Clearstream, Luxembourg and the Issuer will discharge its payment obligations under the Bonds by making payments to the common depositary for Euroclear and Clearstream, Luxembourg for distribution to their account holders. A holder of a beneficial interest in a Global Bond must rely on the procedures of Euroclear and Clearstream, Luxembourg to receive payments under the Bonds. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of beneficial interests in the Global Bonds.

Risks in connection with the application of the German Act on Issues of Debt Securities (Gesetz über Schuldverschreibungen aus Gesamtemissionen)

A Bondholder is subject to the risk of being outvoted and of losing rights towards the Issuer and the Guarantor against his will in the case that Bondholders agree pursuant to the Terms and Conditions of the Bonds to amendments of the Terms and Conditions of the Bonds by majority vote according to the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*). In the case of an appointment of a bondholders' representative for all Bondholders a particular Bondholder may lose, in whole or in part, the possibility to enforce and claim his rights against the Issuer regardless of other Bondholders.

The market value of the Bonds could decrease if the creditworthiness of the Hannover Re Group worsens

If the likelihood that the Issuer will be in a position to fully perform all obligations under the Bonds when they fall due decreases, for example, because of the materialisation of any of the risks regarding the Hannover Re Group or the Guarantor, the market value of the Bonds will suffer. In addition, even if the likelihood that the Issuer will be in position to fully perform all obligations under the Bonds when they fall due actually has not decreased, market participants could nevertheless have a different perception. In addition, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the Hannover Re Group could adversely change. If any of these risks occurs, third parties would only be willing to purchase Bonds for a lower price than before the materialisation of mentioned risk. Under these circumstances, the market value of the Bonds will decrease.

Die Garantin hat die nachrangige unbedingte und unwiderrufliche Garantie (die "**Garantie**") für die fristgerechte Zahlung von Kapital, Zinsen und sonstigen aus den Schuldverschreibungen zu zahlenden Beträgen übernommen. Die Garantie ist ein Vertrag zugunsten jedes Anleihegläubigers als begünstigtem Dritten gemäß § 328 Absatz 1 Bürgerliches Gesetzbuch, der das Recht begründet, die Garantin unmittelbar aus der Garantie auf Erfüllung in Anspruch zu nehmen und Ansprüche aus der Garantie gegen die Garantin unmittelbar durchzusetzen.

(3) Subordinated Guarantee.

The Guarantor has given a subordinated unconditional and irrevocable guarantee (the "**Guarantee**") for the due and punctual payment of principal of, and interest on, and any other amounts expressed to be payable under the Bonds. The Guarantee constitutes a contract for the benefit of each Bondholder as third party beneficiary in accordance with § 328(1) of the German Civil Code (*Bürgerliches Gesetzbuch*), giving rise to the right of the Bondholder to require performance under the Guarantee directly from the Guarantor and to enforce the Guarantee directly against the Guarantor.

(4) Status of the Guarantee.

The obligations of the Guarantor under the Guarantee constitute unsecured obligations of the Guarantor ranking

- (a) subordinated to all unsubordinated obligations of the Guarantor,

(5) No right to set-off.

The Bondholders may not set off any claims arising under the Bonds or the Guarantee against any claims that the Issuer or the Guarantor may have against each of them. The Issuer or the Guarantor may not set off any claims it may have against any Bondholder against any of its obligations under the Bonds or the Guarantee.

**§ 3
(Interest)**

(1) Fixed Interest Period.

(a) In the period from and including 14 September 2010 (the "**Interest Commencement Date**") to but excluding 14 September 2020 (the "**First Call Date**") the Bonds bear interest on their aggregate principal amount at the rate of 5.75 per cent. per annum. During such period, interest is scheduled to be paid annually in arrear on 14 September of each year commencing on 14 September 2011 (each a "**Fixed Interest Payment Date**") and will be due and payable (*fällig*) in accordance with the conditions set out in § 3(3).

(b) Where interest is to be calculated in respect of any period of time that is equal to or shorter than a Fixed Interest

Festzinsperiode ist oder einer Festzinsperiode entspricht, so werden sie berechnet auf der Grundlage der tatsächlichen Anzahl der Tage in dem betreffenden Zinsberechnungszeitraum (ab dem ersten Tag, an dem Zinsen auflaufen (einschließlich) bis zu dem Tag, an dem die Zinsen fällig werden (ausschließlich)), dividiert durch die Anzahl der Tage in der Festzinsperiode, in die der betreffende Zinsberechnungszeitraum fällt (einschließlich des ersten solchen Tages aber ausschließlich des letzten).

"Festzinsperiode" bezeichnet jeden Zeitraum ab dem Zinslaufbeginn (einschließlich) bis zum ersten Festzins-Zahlungstag und nachfolgend ab jedem Festzins-Zahlungstag (einschließlich) bis zu dem jeweils nächstfolgenden Festzins-Zahlungstag (ausschließlich).

(2) Variable Zinsperiode.

(a) Variable Verzinsung.

Im Zeitraum ab dem Ersten Kündigungstermin (einschließlich) bis zum Endfälligkeitstag (wie in § 4(1) definiert) (ausschließlich) werden die Schuldverschreibungen, bezogen auf ihren Gesamtnennbetrag, in Höhe des Variablen Zinssatzes für die betreffende Variable Zinsperiode verzinst. Während dieses Zeitraums sind Zinsen jeweils vierteljährlich nachträglich an jedem Variablen Zinszahlungstag zur Zahlung vorgesehen, und werden nach Maßgabe der in § 3(3) dargelegten Bedingungen fällig.

(b) Variable Zinszahlungstage und Variable Zinsperioden.

"Variabler Zinszahlungstag" bezeichnet den 14. März, 14. Juni, 14. September und 14. Dezember eines jeden Jahres. Falls ein Variabler Zinszahlungstag auf einen Tag fällt, der kein Geschäftstag ist, wird dieser Variable Zinszahlungstag auf den nächstfolgenden Geschäftstag

Period (the **"Calculation Period"**), the interest will be calculated on the basis of the actual number of days elapsed in such Calculation Period (from and including the day from which interest begins to accrue) to but excluding the day on which it falls due), divided by the number of days in the Fixed Interest Period in which the Calculation Period falls (including the first such day but excluding the last).

"Fixed Interest Period" means each period from and including the Interest Commencement Date to but excluding the first Fixed Interest Payment Date and thereafter from and including each Fixed Interest Payment Date to but excluding the next following Fixed Interest Payment Date.

(2) Floating Rate Interest Period.

(a) Floating Rate Interest.

In the period from and including the First Call Date to but excluding the Final Maturity Date (as defined in § 4(1)) the Bonds bear interest on their aggregate principal amount at the Floating Interest Rate for the relevant Floating Interest Period. During such period, interest is scheduled to be paid quarterly in arrear on each Floating Interest Payment Date, and will be due and payable (*fällig*) in accordance with the conditions set out in § 3(3).

(b) Floating Interest Payment Dates and Floating Interest Periods.

"Floating Interest Payment Date" means 14 March, 14 June, 14 September and 14 December in each year. If any Floating Interest Payment Date would otherwise fall on a day which is not a Business Day, it will be postponed to the next day which is a Business Day unless it would thereby

verschoben, sofern er dadurch nicht in den nächsten Kalendermonat fallen würde; in diesem Fall wird der betreffende Variable Zinszahlungstag auf den unmittelbar vorausgehenden Geschäftstag vorgezogen.

"Variable Zinsperiode" bezeichnet jeden Zeitraum ab dem Ersten Kündigungstermin (einschließlich) bis zum ersten Variablen Zinszahlungstag (ausschließlich) und nachfolgend ab jedem Variablen Zinszahlungstag (einschließlich) bis zu dem jeweils nächstfolgenden Variablen Zinszahlungstag (ausschließlich).

(c) Variabler Zinssatz.

Der Zinssatz für die jeweilige Variable Zinsperiode (der **"Variable Zinssatz"**) berechnet sich aus dem Angebotssatz (ausgedrückt als Prozentsatz per annum) für Dreimonatseinlagen in Euro für diese Variable Zinsperiode, der am Zinsfestsetzungstag um 11:00 Uhr vormittags (Brüsseler Ortszeit) auf der Bildschirmseite angegeben wird zuzüglich 4,235 % (die **"Marge"**), wobei alle Festlegungen durch die Berechnungsstelle erfolgen.

(d) In diesen Anleihebedingungen bezeichnet:

"Bildschirmseite" die Reuters-Seite EURIBOR01 (oder eine andere Bildschirmseite von Reuters oder einem anderen Informationsanbieter als Nachfolger, die die Reuters-Seite EURIBOR01 zur Anzeige solcher Sätze ersetzt). Falls der Variable Zinssatz nicht gemäß der oben definierten Bestimmungen ermittelt werden kann, ist der Zinssatz der Angebotssatz bzw. das arithmetische Mittel der Angebotssätze auf der Bildschirmseite an dem letzten Tag vor dem Zinsfestsetzungstag, an dem diese Angebotssätze angezeigt wurden, zuzüglich der Marge;

"Geschäftstag" einen Tag, an dem alle maßgeblichen Stellen des Trans-European Automated Real-time Gross settlement Express Transfer (TARGET 2) Systems Geschäfte tätigen;

Die Berechnungsstelle wird veranlassen, dass der Zinssatz, der Zinsbetrag für die jeweilige Variable Zinsperiode, die jeweilige Variable Zinsperiode und der relevante Variable Zinszahlungstag der Emittentin und, sofern dies von den jeweiligen Wertpapierbörsen, an denen die Schuldverschreibungen notiert sind, vorgesehen ist, der jeweiligen Wertpapierbörsen sowie den Anleihegläubigern durch Bekanntmachung gemäß § 10 baldmöglichst, aber keinesfalls später als zu Beginn der maßgeblichen nächstfolgenden Variablen Zinsperiode, bekannt gemacht wird. Im Fall einer Verlängerung oder Verkürzung der Variablen Zinsperiode kann der mitgeteilte Zinsbetrag und Variable Zinszahlungstag ohne Vorankündigung nachträglich angepasst (oder andere geeignete Anpassungsregelungen getroffen) werden. Jede solche Anpassung wird umgehend allen Wertpapierbörsen, an denen die Schuldverschreibungen zu diesem Zeitpunkt notiert sind, sowie den Anleihegläubigern gemäß § 10 bekannt gemacht.

Alle Bescheinigungen, Mitteilungen, Gutachten, Festsetzungen, Berechnungen, Quotierungen und Entscheidungen, die von der Berechnungsstelle für die Zwecke dieses § 3(2) gemacht, abgegeben, getroffen oder eingeholt werden, sind (sofern nicht ein offensichtlicher Irrtum vorliegt) für die Emittentin, die Hauptzahlstelle und die Anleihegläubiger bindend.

The Calculation Agent will cause the Floating Interest Rate, each Interest Amount for each Floating Interest Period, each Floating Interest Period and the relevant Floating Interest Payment Date to be notified to the Issuer and, if required by the rules of any stock exchange on which the Bonds are from time to time listed, to such stock exchange, and to the Bondholders by notice in accordance with § 10 as soon as possible after their determination, but in no event later than at the beginning of the next relevant Floating Interest Period thereafter. Each Interest Amount and Floating Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements may be made by way of adjustment) without notice in the event of an extension or shortening of the Floating Interest Period. Any such amendment will be promptly notified to any stock exchange on which the Bonds are then listed and to the Bondholders in accordance with § 10.

All certificates, communications, opinions, determinations, calculations, quotations and decisions given, expressed, made or obtained for the purposes of the provisions of this § 3(2) by the Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Principal Paying Agent and the Bondholders.

- Wenn sich die Emittentin an einem Fakultativen Zinszahlungstag zur Nichtzahlung aufgelaufener Zinsen oder nur für eine teilweise Zahlung der aufgelaufenen Zinsen entscheidet, dann ist sie nicht verpflichtet, an dem betreffenden Fakultativen Zinszahlungstag Zinsen zu zahlen bzw. ist sie nur verpflichtet, den Teil der aufgelaufenen Zinsen zu leisten, für dessen Zahlung sie sich entscheidet. - If the Issuer elects not to pay, or to only partially pay, accrued interest on an Optional Interest Payment Date, then it will not have any obligation to pay interest on such Optional Interest Payment Date or will only be obliged to pay such part of the accrued interest it elects to pay, respectively. Business Overview

Non-life reinsurance

Hannover Re Group writes virtually all classes of non-life reinsurance on a global scale. Accounting for more than half of gross premium income, non-life reinsurance remains Hannover Re Group's largest and most important business group. Hannover Re Group does not pursue any growth targets here, but is instead guided by active cycle management according to which business is expanded if the rate situation is favourable and the portfolio is scaled back if prices are inadequate.

Hannover Re Group splits its portfolio into three sections: target markets, specialty lines and global reinsurance.

Hannover Re Group considers Germany and North America to be target markets. They account for around 30% of Hannover Re Group's gross premium volume in non-life reinsurance. Germany is the second-largest non-life reinsurance market in the world. The German market is served by the

¹ In Q1 2010, the Guarantor sold 0.5% of its E+S Rückversicherungs AG shares, reducing its shareholding to 63.69%.

Guarantor's subsidiary E+S Rück which continues to rank as one of the leading providers in Germany. The North American (re)insurance market is the world's largest single market and currently the second-most important for Hannover Re Group's portfolio.

The specialty lines segment includes marine and aviation business, credit/surety, structured products, ILS (Insurance-Linked Securities), the London Market and direct business.

Hannover Re Group combines all markets worldwide under global reinsurance, with the exception of the target markets of Germany and North America and the specialty lines. This segment also encompasses a number of specialised areas such as worldwide catastrophe business, facultative reinsurance, agricultural risks and Sharia-compliant retakaful business.

The following charts provide an overview of the split of non-life segment gross written premium (split within divisions as well as a regional split) for the financial year 2009:

Life and health reinsurance

Reinsurance activities in the life, annuity and health insurance lines are combined under the worldwide Hannover Life Re brand. Hannover Re Group also reinsures personal accident insurance in this business group, insofar as it is transacted by life insurers. The business segment is considered a strategic growth segment for the Hannover Re Group.

The business group structures its customer relationships as long-term partnerships with the goal of designing customised solutions to its clients' individual problems. Life reinsurance is transacted on the basis of a five-pillar model which takes account of distinct customer-oriented products and services:

- Financial solutions:
 Worldwide: new business financing, block assumption transactions in life, personal accident and annuities

December 2008). Net premium earned increased by 31.8% to € 9.3 billion (€ 7.1 billion as at 31 December 2008).

The operating profit (EBIT) increased strongly to € 1.1 billion (€ 148.1 million as at 31 December 2008). The net loss of –€ 127.0 million recorded in the 2008 financial year had been derived from the repercussions of the financial market crisis. The Hannover Re Group net income for 2009 increased by € 858.2 million to € 731.2 million, in part assisted by special effects associated with the ING life reinsurance portfolio as well as by funds withheld by ceding companies. Earnings per share stood at € 6.06 (–€ 1.05 as at 31 December 2008).

Non-life reinsurance

The Guarantor believes that the capital squeeze in the global insurance industry triggered by the financial market crisis stimulated demand for reinsurance. Prices were broadly commensurate with the risks, although the rate increases in some segments – such as US casualty business – were still not adequate. In accordance with Hannover Re Group's underwriting policy, exposures in these areas were therefore further reduced.

After several years of premium declines, the gross premium volume for the non-life reinsurance business group increased by 15.2% to € 5.7 billion (€ 5.0 billion as at 31 December 2008) in 2009. At constant exchange rates, especially relative to the US dollar, growth would have amounted to 13.4%. The level of retained premium rose from 88.9% to 94.1% as a consequence of lower retrocessions. Net premium earned grew by 22.3% to € 5.2 billion (€ 4.3 billion as at 31 December 2008).

Catastrophe losses remained below average in 2009, in part due to a rather unremarkable hurricane season. The Guarantor, therefore, believes that despite a series of devastating natural disasters, the repercussions on the reinsurance industry were slight. The largest single event in 2009 for Hannover Re Group was the severe bush fire in Australia at a cost of € 34.7 million net of reinsurance, followed by winter storm "Klaus" with a cost of € 33.8 million net of reinsurance. The crash of the Air France Airbus resulted in a loss of € 33.8 million net of reinsurance for Hannover Re Group.

Total net expenditure on major claims² in 2009 amounted to € 239.8 million (€ 464.6 million as at 31 December 2008). The combined ratio³ stood at 96.6% (95.4% as at 31 December 2008) in 2009.

The underwriting result decreased to € 143.5 million (€ 184.7 million as at 31 December 2008). Net investment income improved to € 563.2 million (€ 11.1 million as at 31 December 2008), having been impacted by the need to take major write-downs on equities in the previous year. The operating profit (EBIT) in non-life reinsurance increased strongly to € 731.4 million (€ 2.3 million as at 31 December 2008). Hannover Re Group net income grew to € 472.6 million (–€ 160.9 million as at 31 December 2008).

Life and health reinsurance

The Guarantor believes that, given the weakened solvency position of life insurers, the need for reinsurance solutions continued to grow during 2009; and demand thus increased in 2009 for risk- and financially oriented products.

Hannover Re Group's strategic orientation in the US market achieved the assumption of a large portfolio of US life insurance risks (ING life reinsurance portfolio) containing about four million reinsured policies.

² Natural catastrophes and other major losses in excess of € 5 million gross for the Hannover Re Group's share.

³ Combined ratio is defined to be net of reinsurance.

The life reinsurance business group's gross written premium income recorded in 2009 totalled € 4.5 billion, an increase of 44.5% relative to the previous year's figure of € 3.1 billion. While the assumption of the ING life reinsurance portfolio accounted for € 0.8 billion in gross written premium volume, organic growth in the year in 2009 was also on a double-digit percentage level. At constant exchange rates the gross premium would have grown by 46.2%. Net premium earned amounted to € 4.1 billion, while the retention stood at 90.7%.

The operating profit (EBIT) increased to € 372.2 million, generating an EBIT margin of 9.1%. Factoring out the non-recurring one-off effects associated with assumption of the ING life reinsurance portfolio as well as with the fair value adjustments taken on reinsurance deposits furnished to cedants in the United States and United Kingdom, the ordinary operating profit stands at € 230 million.

With a tax ratio of 19.7% and after allowance for minority interests, consolidated net income after tax thus amounted tot € 295.5 million (€ 78.3 million). This was equivalent to earnings of € 2.45 per share.

Competition

As one of the worldwide leading reinsurers, Hannover Re Group competes with reinsurance companies in all regions of the world. The Guarantor believes that the main competitors for Hannover Re Group are Swiss Re, Munich Re, SCOR and several Lloyd's syndicates.

Investments

In 2009, the portfolio of assets under own management showed further growth and reached € 22.5 billion due to positive cash flow from the technical account. Ordinary investment income fell slightly short of the previous year at € 810.5 million (€ 829.8 million as at 31 December 2008). This was due to lower reinvestment yields than those attainable in the course of the previous year.

The balance of deposit interest and expenses was higher at € 276.8 million in 2009 (€ 199.6 million as at 31 December 2008).

Write-downs of € 141.3 million (€ 479.9 million as at 31 December 2008) were taken on investments (excluding real estate) in 2009. Of this total amount, € 92.7 million (€ 26.9 million as at 31 December 2008) were attributable to participating interests and other financial assets – principally private equity and real estate funds. Owing to the minimal holding of equities, write-downs of a mere € 3.2 million (€ 356.1 million as at 31 December 2008) were taken in 2009. In the area of fixed-income assets they were halved to € 45.4 million (€ 96.9 million as at 31 December 2008).

In light of increased fair values, these write-downs in 2009 contrasted with write-ups of € 20.1 million (– as at 31 December 2008) on fixed-income securities and funds that had been written down in prior periods. Net gains of € 113.0 million were realised on disposals, as against a net loss of –€ 113.6 million in the previous year. Unrealised gains on asset holdings measured at fair value through profit or loss amounted to € 100.6 million in 2009, contrasting with unrealised losses of –€ 119.7 million in the previous year. The positive development can be attributed primarily to the derivatives embedded in US life reinsurance contracts.

The Hannover Re Group substantially increased its net investment income to more than € 1.1 billion (€ 278.5 million as at 31 December 2008) in 2009 due first and foremost to the development of unrealised gains and the considerably lower volume of write-downs.

The portfolio of fixed-income securities increased to € 19.7 billion (€ 17.9 billion as at 31 December 2008) in 2009, first and foremost due to inflows of cash from the technical account. The funds were invested predominantly in government bonds and corporate bonds. Hidden reserves for fixed-income securities recognised in shareholders' equity totalled € 252.3 million (€ 101.7 million as at

31 December 2008). This increase was also similarly reflected as an increase in the shareholders' equity recognised in the balance sheet. The spread of asset classes naturally shifted towards sovereign risks at the expense of semi governmental bonds owing to the numerous state guarantees invoked in the public financial sector. The Guarantor believes that the quality of the bonds – measured in terms of rating categories – was maintained on a consistently high level. The proportion of securities⁴ rated "A" or better – at 91.7% – was slightly lower in 2009 than in the previous year (92.9%).

Litigation and Proceedings

Within the scope of their ordinary business activities the companies of the Hannover Re Group are involved in judicial and extra-judicial proceedings in Germany and abroad both as plaintiffs or petitioners and as defendants or respondents, in their capacity as reinsurance and insurance companies, taxpayers and employers, respectively. It is not feasible to predict or determine the ultimate outcome of these proceedings. The Guarantor, however, does not believe that the outcome of these pending or threatened proceedings from ordinary business activities will have significant effects on the financial position or profitability of the Hannover Re Group, after consideration of any applicable reserves, in such a way that the ability to perform the obligations under the bonds would be materially adversely affected.

German Financial Reporting Enforcement Panel Audit

The Hannover Re Group is currently subject to a sample audit (*stichprobenartige Prüfung*) by the German Financial Reporting Enforcement Panel (Deutsche Prüfstelle für Rechnungslegung e.V., the "DPR"). The DPR examines on the basis of Articles 342 et seq. German Commercial Code the consolidated financial statements of companies relevant to the capital markets to ensure that these financial statements have been properly prepared. The subject of the audit are Hannover Re Group's consolidated financial statements and management report for the 2008 fiscal year as well as the Guarantor's annual financial statements and management report for the fiscal year 2008. Since the audit commenced in August 2009 documents have been requested and provided by the Guarantor in a number of cycles. The Guarantor is not aware of any written findings suggesting that the financial statements and management reports, which received unqualified auditors' opinions from the external auditors were not prepared properly.

⁴ Except for derivative instruments on fixed income securities.

Recent developments/Trend Information

While the burden of major losses in the second quarter of 2010 was lower than in the first quarter, it again exceeded the expected level for the second quarter. The loss of the "Deepwater Horizon" drilling rig in the Gulf of Mexico in April resulted in substantial environmental damage as well as corresponding strains for the insurance industry. Given the considerable uncertainty surrounding possible liability claims, the total loss expenditures are still difficult to forecast at the present time. The loss reserves that the Hannover Re Group has established – giving rise to a net strain of EUR 88.9 million – reflect all concrete and potential exposures of our portfolio from this loss complex that are currently known to the Hannover Re Group. The largest single loss for the Hannover Re Group in 2010 was the earthquake in Chile with a net strain of EUR 182.1 million net of reinsurance. Altogether, the net burden of major losses in the first half-year stood at EUR 407.6 million (EUR 163.3 million), a figure appreciably higher than the expected level. The combined ratio non-life net of reinsurance of 99.5% (97.1% as at 30 June 2009) was assisted by positive effects from the run-off of reserves for prior years in the first quarter 2010.

The Hannover Re Group's risk from government bonds issued by Greece, Portugal, Spain, Italy and Ireland is limited. Hannover Re Group's total exposure in this regard is around EUR 404 million as of 30 June 2010; this is equivalent to a mere 1.6% of the assets under own management. Thereof, Hannover Re Group has only a minimal investment of EUR 30 million in Greek government bonds.

There has been no significant change in the financial or trading position of the Guarantor since 30 June 2010, other than as disclosed in this Prospectus. In addition, there has been no material adverse change in the prospects of the Guarantor since 31 December 2009.

The following is a general description of certain tax considerations relating to the purchasing, holding and disposing of Bonds. It does not purport to be a complete analysis of all tax considerations relating to the Bonds. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular bondholder. The discussions that follow for each jurisdiction are based upon the applicable laws in force and their interpretation on the date of this Prospectus. These tax laws and interpretations are subject to change that may occur after such date, even with retroactive effect.

The information contained in this section is limited to taxation issues and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Bonds.

Prospective holders of Bonds ("Bondholders") should consult their own tax advisers as to the particular tax consequences of subscribing, purchasing, holding and disposing the Bonds, including the application and effect of any federal, state or local taxes, under the tax laws of Germany, Luxembourg and each country of which they are residents or citizens.

Taxation in Germany

The following summary does not consider all aspects of income taxation in Germany that may be relevant to a holder of the Bonds in the light of the holder's particular circumstances and income tax situation. The summary applies to investors holding the Bonds as private investment assets (except where explicitly stated otherwise) and is not intended to be, nor should it be construed to be, legal or tax advice. This discussion is based on German tax laws and regulations, all as currently in effect (except where explicitly stated otherwise) and all subject to change at any time, possibly with retroactive effect. **Prospective holders should consult their own tax advisers as to the particular tax consequences to them of subscribing, purchasing, holding and disposing of the Bonds, including the application and effect of state, local, foreign and other tax laws and the possible effects of changes in the tax laws of Germany.**

German resident Bondholders

Interest income

If the Bonds are held as private assets (*Privatvermögen*) by an individual investor whose residence or habitual abode is in Germany, payments of interest under the Bonds are taxed as investment income (*Einkünfte aus Kapitalvermögen*) at a 25 per cent. flat tax (*Abgeltungsteuer*) (plus a 5.5 per cent. solidarity surcharge thereon and, if applicable to the individual investor, church tax).

The flat tax is generally collected by way of withholding (see succeeding paragraph – *Withholding tax*) and the tax withheld shall generally satisfy the individual investor's tax liability with respect to the Bonds. If, however, no or not sufficient tax was withheld the investor will have to include the income received with respect to the Bonds in its income tax return and the flat tax will then be collected by way of tax assessment. The investor may also opt for inclusion of investment income in its income tax return if the aggregated amount of tax withheld on investment income during the year exceeded the investor's aggregated flat tax liability on investment income (e.g., because of an available loss carry forward or a foreign tax credit). If the investor's total income tax liability on all taxable income including the investment income determined by generally applicable graduated income tax rates is lower than 25 per cent. the investor may opt to be taxed at graduated rates with respect to its investment income.

Individual investors are entitled to a tax allowance (*Sparer-Pauschbetrag*) for investment income of 801 Euro per year (1,602 Euro for married couples filing their tax return jointly). The tax allowance is taken into account for purposes of the withholding tax (see succeeding paragraph – *Withholding tax*) if the investor files a withholding tax exemption request (*Freistellungsauftrag*) with the respective bank or financial institution where the securities deposit account to which the Bonds are allocated is held. The deduction of related expenses for tax purposes is not possible.

If the Bonds are held as business assets (*Betriebsvermögen*) by an individual or corporate investor who is tax resident in Germany (i.e., a corporation with its statutory seat or place of management in Germany), interest income from the Bonds is subject to personal income tax at graduated rates or corporate income tax (each plus solidarity surcharge thereon) and trade tax. The trade tax liability depends on the applicable trade tax factor of the relevant municipality where the business is located. In case of individual investors the trade tax may, however, be partially or fully creditable against the investor's personal income tax liability depending on the applicable trade tax factor and the investor's particular circumstances. The interest income will have to be included in the investor's personal or corporate income tax return. Any German withholding tax (including surcharges) is generally fully creditable against the investor's personal or corporate income tax liability or refundable, as the case may be.

Withholding tax

If the Bonds are kept or administered in a domestic securities deposit account by a German credit or financial services institution (or by a German branch of a foreign credit or financial services institution), or by a German securities trading firm (*Wertpapierhandelsunternehmen*) or a German securities trading bank (*Wertpapierhandelsbank*) (altogether the "**Domestic Paying Agent**") which pays or credits the interest, a 25 per cent. withholding tax, plus a 5.5 per cent. solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375 per cent, is levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax is collected for the individual investor.

If Luxembourg tax was withheld on interest paid to German investors according to the Savings Directive (as defined below under the header EU Savings Tax Directive) the German investor should generally be entitled to a credit or a refund of the tax withheld against its German income tax liability. Neither the Issuer nor the Guarantor will be required, however, to pay Additional Amounts in this instance pursuant to § 6 of the Terms and Conditions.

Capital gains from disposal or redemption of the Bonds

Subject to the tax allowance for investment income described under *Interest income* above capital gains from the sale or redemption of the Bonds held as private assets are taxed at the 25 per cent. flat tax (plus a 5.5 per cent. solidarity surcharge thereon and, if applicable to the individual investor, church tax). The capital gain is generally determined as the difference between the proceeds from the sale or redemption of the Bonds and the acquisition costs.

Expenses directly related to the sale or redemption are taken into account. Otherwise, the deduction of related expenses for tax purposes is not possible.

Capital losses from the Bonds held as private assets are tax-recognized irrespective of the holding period of the Bonds. The losses may, however, not be used to offset other income like employment or business income but may only be offset against investment income subject to certain limitations. Losses not utilized in one year may be carried forward into subsequent years but may not be carried back into preceding years.

The flat tax is generally collected by way of withholding (see succeeding paragraph – *Withholding tax*) and the tax withheld shall generally satisfy the individual investor's tax liability with respect to

the Bonds. With respect to the return filing investors are referred to the description under *Interest income* above.

If the Bonds are held as business assets (*Betriebsvermögen*) by an individual or corporate investor that is tax resident in Germany, capital gains from the Bonds are subject to personal income tax at graduated rates or corporate income tax (plus solidarity surcharge thereon) and trade tax. The trade tax liability depends on the applicable trade tax factor of the relevant municipality where the business is located. In case of an individual investor the trade tax may, however, be partially or fully creditable against the investor's personal income tax liability depending on the applicable trade tax factor and the investor's particular circumstances. The capital gains will have to be included in the investor's personal or corporate income tax return. Any German withholding tax (including surcharges) is generally fully creditable against the investor's personal or corporate income tax liability or refundable, as the case may be.

Withholding tax

If the Bonds are kept or administered by a Domestic Paying Agent at the time of their disposal or redemption, a 25 per cent. withholding tax, plus a 5.5 per cent. solidarity surcharge thereon, is levied on the capital gains, resulting in a total withholding tax charge of 26.375 per cent. If the Bonds have been kept or administered by that Domestic Paying Agent from the time of their acquisition, the capital gains are generally determined as the difference between the proceeds from the sale or redemption of the Bonds and the acquisition costs. If the Bonds are sold or redeemed after being transferred to another Domestic Paying Agent, the 25 per cent. withholding tax (plus solidarity surcharge thereon) will be levied on 30 per cent. of the proceeds from the sale or the redemption, as the case may be, unless the investor or the previous account bank was able and allowed to provide evidence for the investor's actual acquisition costs to the new Domestic Paying Agent. The applicable withholding tax rate is in excess of the aforementioned rate if church tax is collected for the individual investor.

No withholding is generally required on capital gains derived by German resident corporate Bondholders and upon application by individual Bondholders holding the Bonds as business assets.

Non-German resident Bondholders

Income derived from the Bonds by holders who are not tax resident in Germany is in general exempt from German income taxation, and no withholding tax shall be withheld, provided however (i) the Bonds are not held as business assets of a German permanent establishment of the investor or by a permanent German representative of the investor and (ii) the income derived from the Bonds does not otherwise constitute German source income, for example, such as presenting the Bonds for payment or credit at the offices of a German credit or financial services institution including a German branch of a foreign credit or financial services institution (over-the-counter transaction).

If the income derived from the Bonds is subject to German taxation according to (i) or (ii) above, the income is subject to withholding tax similar to that described above under the paragraphs *Withholding tax*. Under certain circumstances, foreign investors may benefit from tax reductions or tax exemptions under applicable double tax treaties (*Doppelbesteuerungsabkommen*) entered into with Germany.

Inheritance tax / gift tax

The transfer of Bonds to another person by way of gift or inheritance is subject to German gift or inheritance tax, respectively, if

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association (*Personenvereinigung*) or estate

(*Vermögensmasse*), had its seat or place of management in Germany at the time of the transfer of property,

- (ii) except as provided under (i), the testator's or donor's Bonds belong to a business asset attributable to a permanent establishment or a permanent representative in Germany,

Special regulations apply to certain German expatriates.

Investors are urged to consult with their tax advisor to determine the particular inheritance or gift tax consequences in light of their particular circumstances.

Other taxes

The purchase, sale or other disposal of Bonds does not give rise to capital transfer tax, value added tax, stamp duties or similar taxes or charges in Germany. However, under certain circumstances entrepreneurs may choose liability to value added tax with regard to the sales of Bonds which would otherwise be tax exempt. Net wealth tax (*Vermögensteuer*) is, at present, not levied in Germany.

EU Savings Tax Directive

Under European Council Directive 2003/48/EC (the "**EU Savings Directive**") on the taxation of savings income, each Member State is required to provide to the tax authorities of another Member State details of payments of interest or other similar income paid by a person within its jurisdiction to, or collected by such a person for, an individual resident or certain limited types of entities established in that other Member State. However, for a transitional period, Austria and Luxembourg may instead apply a withholding system in relation to such payments, deducting tax at rates rising over time to 35 per cent. (unless during that transitional period they elect to provide information in accordance with the EU Savings Directive). The transitional period is to terminate at the end of the first full fiscal year following agreement by certain non-EU countries to the exchange of information relating to such payments.

A number of non-EU countries, and certain dependent or associated territories of certain Member States, have adopted similar measures (either provision of information or transitional withholding) in relation to payments made by a person within its jurisdiction to, or collected by such a person for, an individual resident or certain limited types of entities established in a Member State. In addition, the Member States have entered into provision of information or transitional withholding arrangements with certain of those dependent or associated territories in relation to payments made by a person in a Member State to, or collected by such a person for, an individual resident or certain limited types of entity established in one of those territories.

On 13 November 2008 the European Commission published a proposal for amendments to the EU Savings Directive, which included a number of suggested changes which, if implemented, would broaden the scope of the requirements described above. The European Parliament approved an amended version of this proposal on 24 April 2009. Investors who are in any doubt as to their position should consult their professional advisers.

In Germany and Luxembourg, the Savings Directive has been implemented as from 1 July 2005.

Taxation in the Grand Duchy of Luxembourg

Residence

Bondholders will not become resident, or deemed to be resident, in Luxembourg by reason only of the holding, execution, performance, delivery and/or enforcement of the Bonds.

Withholding Tax

All payments of interest and principal by the Issuer in the context of the holding, disposal, redemption or repurchase of the Bonds can be made free and clear of any withholding or deduction for or on account of any taxes of whatsoever nature imposed, levied, withheld, or assessed by Luxembourg or any political subdivision or taxing authority thereof or therein, in accordance with the applicable Luxembourg law, subject however to:

- (i) the application of the Luxembourg laws of 21 June 2005 implementing the European Council Directive 2003/48/EC on the taxation of savings income and several agreements concluded with certain dependent or associated territories of the European Union (“EU”) and providing for the possible application of a withholding tax (20 per cent. from 1 July 2008 to 30 June 2011 and 35 per cent. as from 1 July 2011) on interest paid to certain non Luxembourg resident investors (individuals and certain types of entities called “Residual entities”) in the event of the Issuer appointing a paying agent in Luxembourg within the meaning of the above-mentioned directive (see section “EU Savings Directive” above) or agreements. “Residual entities” within the meaning of Article 4.2 of the EU Savings Directive are entities established in a Member State or in certain EU dependent or associated territories which are not legal persons (the Finnish and Swedish companies listed in Article 4.5 of the EU Savings Directive are not considered as legal persons for this purpose), whose profits are not taxed under the general arrangements for the business taxation, which are not UCITS recognised in accordance with the European Council Directive 85/611/EEC or similar collective investment funds located in Jersey, Guernsey, the Isle of Man, the Turks and Caicos Islands, the Cayman Islands, Montserrat or the British Virgin Islands and which have not opted to be treated as UCITS recognised in accordance with the European Council Directive 85/611/EEC);
- (ii) the application as regards Luxembourg resident individuals or certain residual entities that secure interest payments on behalf of such individuals (unless such entities have opted either to be treated as UCITS recognised in accordance with the European Council Directive 85/611/EEC or for the exchange of information regime) of the Luxembourg law of 23 December 2005, as amended by the law of 17 July 2008, which has introduced a 10 per cent. withholding tax on savings income (i.e. with certain exemptions, savings income within the meaning of the Luxembourg laws of 21 June 2005 implementing the EU Savings Directive). This law is applicable to savings income accrued as from 1 July 2005 and paid as from 1 January 2006.

Pursuant to the law of 23 December 2005 as amended by the law of 17 July 2008, Luxembourg resident individuals can opt to self declare and pay a 10 per cent. tax on interest payments made by paying agents located in a Member State of the European Union other than Luxembourg, a Member State of the European Economic Area or in a State or territory which has concluded an agreement directly relating to the EU Savings Directive.

The 10 per cent. withholding tax as described above or the 10 per cent. tax represent the final tax liability for Luxembourg resident individuals acting in the context of the management of their private wealth.

Responsibility for the withholding of tax in application of the above-mentioned Luxembourg laws of 21 June 2005 and 23 December 2005 is assumed by the Luxembourg paying agent within the meaning of these laws and not by the Issuer.

Taxes on Income and Capital Gains

Bondholders who derive income from such Bonds or who realize a gain on the disposal or redemption thereof will not be subject to Luxembourg taxation on such income or capital gains,

subject to the application of the laws of 21 June 2005 and 23 December 2005 referred to above, and unless:

- (a) such Bondholders are, or are deemed to be, resident in Luxembourg for Luxembourg tax purposes (or for the purposes of the relevant provisions), or
- (b) such income or gain is attributable to an enterprise or part thereof which is carried on through a permanent establishment, a permanent representative or a fixed base of business in Luxembourg.

Net Wealth Tax

Luxembourg net wealth tax will not be levied on a corporate holder of Bonds unless:

- (a) such Bondholder is, or is deemed to be, resident in Luxembourg for the purpose of the relevant provisions and is not a Bondholder governed by (i) the law of 31 July 1929 on holding companies; (ii) the laws of 20 December 2002 and 13 February 2007 on undertakings for collective investment; (iii) the law of 22 March 2004 on securitisation; (iv) the law of 15 June 2004 on the investment company in risk capital; or (v) the law of 11 May 2007 on family estate management companies; or
- (b) such Bond is attributable to an enterprise or part thereof which is carried on through a permanent establishment, a permanent representative or a fixed base of business in Luxembourg.

As regards individuals, the Luxembourg law of 23 December 2005 has abrogated the net wealth tax starting with the year 2006.

Inheritance and Gift Tax

Where the Bonds are transferred for no consideration:

- (a) no Luxembourg inheritance tax is levied on the transfer of the Bonds upon death of a holder of Bonds in cases where the deceased holder was not a resident of Luxembourg for inheritance tax purposes; or
- (b) Luxembourg gift tax will be levied in the event that the gift is made pursuant to a notarial deed signed before a Luxembourg notary or is registered in Luxembourg.

Value Added Tax

There is no Luxembourg value-added tax payable in respect of payments in consideration for the issue of the Bonds or in respect of the payment of interest or principal under the Bonds or the transfer of the Bonds. Luxembourg value added tax may, however, be payable in respect of fees charged for certain services rendered to the Issuer, if for Luxembourg value added tax purposes such services are rendered, or are deemed to be rendered, in Luxembourg and an exemption from value added tax does not apply with respect to such services.

Other Taxes and Duties

It is not compulsory that the Bonds be filed, recorded or enrolled with any court or other authority in Luxembourg or that registration tax, transfer tax, capital tax, stamp duty or any other similar tax or duty (other than court fees and contributions for the registration with the Chamber of Commerce) be paid in respect of or in connection with the execution, delivery and/or enforcement by legal proceedings (including any foreign judgment in the courts of Luxembourg) of the Bonds in accordance therewith. However in case of court proceedings in a Luxembourg court (including but not limited to a Luxembourg insolvency proceeding), registration of the Bonds and/or the finance documents may be ordered by the court, in which case the Bonds and/or the finance documents will be respectively subject to a fixed duty of € 12 or an ad valorem duty. Registration would in principle

further be ordered, and the same registration duties could be due, when the Bonds are produced, either directly or by way of reference, before an official authority (*autorité constituée*) in Luxembourg.

SUBSCRIPTION AND SALE OF THE BONDS

General

Pursuant to a subscription agreement dated 10 September 2010 (the "**Subscription Agreement**") among the Issuer, the Guarantor and BNP Paribas, Commerzbank Aktiengesellschaft, Crédit Agricole Corporate and Investment Bank and J.P. Morgan Securities Ltd. (together, the "**Joint Lead Managers**"), the Issuer has agreed to sell to the Joint Lead Managers, and the Joint Lead Managers have agreed, subject to certain customary closing conditions, to purchase, the Bonds on 14 September 2010. The Issuer has furthermore agreed to pay certain fees to the Joint Lead Managers and to reimburse the Joint Lead Managers for certain expenses incurred in connection with the issue of the Bonds.

The Subscription Agreement provides that the Joint Lead Managers under certain circumstances will be entitled to terminate the Subscription Agreement. In such event, no Bonds will be delivered to investors. Furthermore, the Issuer has agreed to indemnify the Joint Lead Managers against certain liabilities in connection with the offer and sale of the Bonds.

The Joint Lead Managers or their respective affiliates, including parent companies, engage, and may in the future engage, in investment banking, commercial banking (including the provision of loan facilities) and other related transactions with the Issuer and the Guarantor and their affiliates and may perform services for them, for which the Joint Lead Managers or their affiliates have received or will receive customary fees and commissions, in each case in the ordinary course of business.

There are no interests of natural and legal persons involved in the issue, including conflicting ones, that are material to the issue.

Selling Restrictions

General

Each Joint Lead Manager has acknowledged that other than explicitly mentioned in this Prospectus no action is taken or will be taken by the Issuer or the Guarantor in any jurisdiction that would permit a public offering of the Bonds, or possession or distribution of any offering material relating to them, in any jurisdiction where action for that purpose is required.

Each Joint Lead Manager has represented and agreed that it will comply with all applicable laws and regulations in each jurisdiction in which it purchases, offers, sells or delivers Bonds or has in its possession or distributes any offering material relating to them.

United States of America and its Territories

The Bonds and the Guarantee have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act ("**Regulation S**").

The Bonds are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code of 1986 and regulations thereunder.

Each Joint Lead Manager has agreed that, except as permitted by the Subscription Agreement, it will not offer, sell or deliver the Bonds (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the Issue Date, within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Bonds during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Bonds within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering of the Bonds, an offer or sale of Bonds within the United States by a dealer that is not participating in the offering may violate the registration requirements of the Securities Act.

United Kingdom of Great Britain and Northern Ireland

Each Manager has represented and agreed that:

- (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 (the "**FSMA**")) received by it in connection with the issue or sale of the Bonds in circumstances in which section 21(1) of the FSMA does not apply to the Issuer; and
- (b) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Bonds in, from or otherwise involving the United Kingdom.

⁷ Standard & Poor's defines "A" as follows:

"An obligation rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong."

⁸ A.M. Best defines "a" as follows: "Strong. Assigned to issues where, in [A.M. Best's] opinion, the issuer has a strong ability to meet the terms of the obligation."

⁹ Standard & Poor's defines "AA-" as follows:

"An obligation rated "AA" differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories."

Bondholders should be aware that a credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

¹⁰ A.M. Best defines "A" as follows: "Excellent. Assigned to companies that have, in [A.M. Best's] opinion, an excellent ability to meet their ongoing insurance obligations." Rating outlooks are assigned by A.M. Best to an interactive financial strength rating to indicate its potential direction over an intermediate term generally defined as 12 to 36 months. A "stable" outlook "indicates low likelihood of a rating change due to stable financial/market trends".

Bondholders should be aware that a credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.
